

PLAGIARISM SCAN REPORT

Content Checked For Plagiarism

15% OF US INDIVIDUALS LOSE \$10,000 PER YEAR BECAUSE OF THEIR POOR FINANCIAL LITERACY.

This is data from a CNBC analysis of 2022. That is a serious setback that demonstrates the value of education in financial matters. To that end, it is not a bad plan to peruse the monetary-focused playlists on YouTube.

By extrapolating these concepts to the fintech sector, it becomes clear that YouTube can serve as a starting point for many users' education in financial literacy. Experts in the field can use the site to research obscure topics, learn about developments in their field, and share their knowledge with others.

As a result, we've made the decision to compile a list of recommended YouTube channels for both audiences in 2021, so that they can learn first and make money second.

The Artificial Intelligence Channel

Originating on March 3rd, 2008

Major subfields include artificial intelligence, machine learning, predictions for the future of technology, nanotechnology, anti-aging, space travel, virtual reality, quantum communications, genetics, brain research, etc.

Who it may be of interest to: Even though the channel hasn't been updated in over 2 years, there is still lots of useful information here for those interested in artificial intelligence. Therefore, if you have even a passing fascination with AI, you'll find plenty to like here. Don't miss out on the chance to expand your knowledge in areas including extraneural bioelectric computation, quantum sensing, robotizing the workplace, future space exploration, ML problems, virtual reality's effect on human interaction, and more.

Innovate Finance

British Isles; London

Independently representing Britain's fintech community, Innovate Finance is a membership association with this goal in mind. To promote technology-led change for the betterment of society and bring together the world's largest financial ecosystem around the common concerns all businesses face is central to our goal.

Artificial Intelligence and Blockchain

The path towards blockchain and AI. Jump the learning curve of a revolutionary new technology that will soon alter our daily lives. The future of artificial intelligence and its effects on society are the subjects of AIB's investigations. Discovery,

connection, and taking action are at the heart of AIB, making it a unique type of entertainment. How does blockchain alter the playing field? When do we expect money to change? How will our lives change when AI becomes commonplace? Find out how you can take advantage of AI right now and how the blockchain is changing the world.

TECH IN 5 MINUTES

As the name suggests, they offer unique perspectives on a variety of technological topics, including the internet of things, software development, the coding of mobile applications, infrastructure, and cloud computing. They have demonstrated our competence in constructing specialized development teams in order to provide our customers with development services that are of a high quality and are cost effective.

Their ambitions for the software are shown by the countless cases of successful digital transformation, one-of-a-kind enterprise engineering and design, and high-quality technology consulting services that they have provided. Their Channel is where they disseminate the most recent breaking technological news.

Analytics Insight

First of its kind, Analytics Insight covers AI, Big Data, and analytics in both print and digital formats. Through in-depth market analysis, the Analytics Insight platform identifies chances for growth and helps businesses focus their efforts. It aids decision-makers in sensing, reacting, and adapting to fluctuating market situations, allowing them to better innovate technological processes and predict sales.

CFTE

To help finance professionals and technologists succeed in the emerging Fintech industry, CFTE is developing an educational platform. Over 70,000 professionals from 100+ countries have put their faith in our network to help them advance their careers. If you want to be a part of the financial industry of the future, then you need an education from them.

M-Tech

In 2013, they launched a YouTube channel powered by AI. Their channel is dedicated to highlighting cutting-edge AI products, developments, and news.

Their mission is to inform and entertain audiences so that they can better grasp the dynamic field of artificial intelligence.

Everything from machine learning and NLP to computer vision and robotics is discussed on their channel. They hope that you will find our information both instructive and motivating, whether you are a student, researcher, or just someone interested in the exciting area of AI. Come be a part of our group and always be in the know about AI progress!

fintelics

New technology consultancy and solution provider Fintelics uses ABCDEF to create individualized solutions for its clients.

Data engineering; edge computing; blockchain technology; cloud computing; AI; full-stack omnichannel software

TechVariable

Tech Variable: "New Possibilities through Technology."

They are a collective of young people from Assam and the surrounding regions that formed in 2015. The majority of our staff are software engineers who collaborate closely with our international clientele in the areas of Design, Data, and Deep Technology. We broadcast business events, podcasts, and lectures here, as well as highlight their unique workplace culture.

TechVariable provides services throughout the whole lifecycle of an IT product. TechVariable's mission is to strengthen Northeast India's IT ecosystem and build a structure that encourages people to relocate back to Assam. Join forces with the Northeast's information technology superpower!

Ai FinTech Futurist

You tend to get stopped by AI FinTech Futurist, who they investigate the fascinating future of AI, money, and tech. Come along as we explore the impact that AI will have on the future of the financial services industry. The newest trends, developments, and achievements in the sector are revealed through in-depth debates and analyses. Get ahead of the curve with our cutting-edge material that delves into how AI is transforming the financial services industry.
